Made for you

Making in India, to make it easy for you. Deep understanding of the Indian climatic conditions, a better insight into the Indian market place, and the assurance of someone close by when needed, are all the hallmarks of OASIS. It's time to change the 'foreign-made-is-superior' mindset. Indian brands are taking the world by storm, it is India's time to shine. OASIS gives you the best of both worlds: Superior quality at cost-effective prices for you. Get the OASIS edge.

We started 'OASIS DECOR' in 2002 targeting the maintenance free Modular Kitchen Shutters manufacturing with sophisticated Machinery and Infrastructure. Our unmatched expertise has revolutionized the concept of Membrane shutters in India. Unlike many others, at OASIS we focus on service, quality and innovation rather than simply volume, and this has resulted into Oasis Decor growing from strength to strength and now serving more than 650 TRADE customers throughout India.

Inspired with that success and motivated by our customers support now we are venturing into "uPVC Profile" manufacturing with an aim of providing high quality uPVC Profiles while maintaining cost savings, timely deliveries and as well as customer services.

Oasis Poly Profile Private limited is established and centrally located in India at Hyderabad manufacture and supply good quality uPVC Profiles for Window & Door. As a TRADE customer, you will find Oasis Poly Profile a friendly, honest and reliable company to deal with. Experienced staff are on hand to help for your requirements whether it is product/technical queries, installation advice, sales and marketing or business advice.

Present uPVC MARKET

- uPVC Profile Industry has attained worldwide growth. Among the other industries the uPVC Profile industry has high potential growth.
- All the developed countries are using uPVC doors & windows.
- Most of the domestic suppliers are importing uPVC Profiles from various countries.
- Government of India has issued guidelines to the builders to use material other than wood. The environment disasters can be prevented by using uPVC Profile Windows & Doors.

We believe by making small steps together, businesses can have a positive impact on the environment. Building on this foundation, we work diligently to also provide the best 'Green' household products.

You will also quickly appreciate the quality and diversity of the Oasis product range, helping you win more business at better margins.

Sincerely hope our service can make your life and work more easier.

Why uPVC ?

Particular	uPVC	Aluminium	Wood
Surface quality	The surface quality is maintained throughout its useful life.	Anodizing wears out and corrosion sets it.	Requires regular up keeping.
Thermal insulation	Excellent protection from atmosphere heat transmission due to wider profile depth and multi chamber section and low K value.	Poor, being a metal it has a poor thermal insulation and high thermal conductivity.	Fair
Fire retardant	Excellent	Fair	Poor
Acoustic Insulation	Excellent, the mutli-chamber sealed cavities and welded corners offer excellent acoustic insulating properties.	Poor, the mechanically joint corners renders very poor result from acoustci insulation angle.	Fair
Dimensional accuracies	Excellent. Fabricated by state of art sophisticated machine hence offers uniform quality control.	Poor, they are fabricated manually hence poor quality and non-uniformity.	Fair
Conservation of energy	Excellent	Require 7.5 times the energy than that required to manufacture PVC	-----
Preservation of natural forest wealth	Excellent	Excellent	Poor
Maintenance	Less maintenance, due to pristine appearance no periodical paint work or lubrication! Just simple cleaning with any detergent will keep the window as new as ever.	Regular maintenance should be done.	Requires regular painting & Polishing.
Durability	Much stronger due to galvanized iron steel reinforcement.	Good	Good
Warping	Does not warp. Last for a life time.	Can warp	Can warp
Rot, rusting or corroding	Doesn't Rot, Corrode or Rust.	Will rust, corrode.	Changes due to climatic conditions.

Advantages

Environment Friendly

Easy Installation

Cost Effective

Noise Reduction

Recyclable

Less Maintenance

Fire Retardant

Long Life

Thermal Insulation

Termite Resistant

Corrosion Resistant

Aesthetic... Forever
